

## SOLWA PRESENTS DRYWA AT THE CONVENTION ON WASTE WATER TREATMENT INNOVATIONS IN ITALY

SOLWA presents its sludge dryer - **DryWa** - at the Convention on “*Innovation and energy savings in the Waste Water Treatment Plants*” in Quarto d’Altino (Venice | Italy) in October 12<sup>nd</sup> 2016.

The Convention is an occasion for the invited speakers to present innovations for reducing energy waste, reusing raw materials and optimizing management costs.

The participants at the Convention (at least 100 attendees) comes from public and private Companies of the water treatment sector. Dr. Paolo Franceschetti, Managing Director of Solwa Srl, presents DryWa under the topic “Saving costs through sludge thermal drying”. Other Companies and organizations are participating to present their technological systems.

The convention is the follow-up of a meeting realized in 2014 and the main goal is to understand better possible technological innovations to reduce costs in the waste water treatment sector.

**Solwa is invited to present DryWa as innovative dryer for sewage sludge and as technology successfully tested in the Waste Water Treatment Plant of Quarto d’Altino in Venice.**

Dr. Paolo Franceschetti, Managing Director of Solwa says that “*DryWa has showed its potentialities of cost reduction in a Waste Water Treatment Plant (WWTP). DryWa was tested directly in two WWTPs under the control of Public Bodies and Private Companies, guaranteeing its performances, low energy need, high flexibility and close to zero air/odor emissions. Solwa vision is to improve these exciting results, through a deeper cooperation with its Customers, meeting their specific needs*”.
